extension to the entire Weight and Measure System, both here and in Great Britain, highly desirable; but such extension is not contemplated in the present prayer of your Memorialists, which limits itself to what is easily practicable and is in the direct line of farther improvement.

In view of what has been said, then, and of the great convenience that citizens of the two countries will find when the coins of each pass in the other with the same facility as ours now do, between the different and distant States of this Union;—of the great economy of time and labour that Commerce will experience in thus getting rid of tedious calculations of conversions and exchanges,—and of the great, though silent and unpretending help that will be given to the civilization of the human race in this concession to uniformity by two great nations whose common language is already spoken over half the globe:—Your Memorialists respectfully pray that your Honourable Bodies will give to this subject a wise and favourable consideration;—and by joint resolution, or otherwise, will authorize the President of the United States to enter into such correspondence with the Government of Great Britain as may secure, in a reasonable time, a proper uniformity of Coinage, in the mode that may be found most discreet and convenient.

And your Memorialists will ever pray, &c.
